

JCORET Course Requirements

Course Number

JCORET will provide a JCORET Course number to enable course listing and monitoring systems to identify your course. JCORET will determine this number based on a numbering systems and the review of your course materials.

Course Certificate

JCORET will provide a course certificate which must be presented to each person who has completed the JCORET approved course. The instructor will need to monitor attendance and participation to determine if a student has demonstrated the engagement necessary to qualify as having completed the course. The instructor may also wish to provide other certification for this course. This is allowed but should not be combined with the JCORET certificate.

Course Evaluation Form

JCORET will provide a course evaluation form for each student to complete after the course. This will be tabulated by JCORET to enable JCORET to monitor the outcomes of each course and improve the quality of course offerings. The author must provide a list of course outcomes to complete the template form.
